QUALIFICATION SUMMARY

- CS Ph.D. student in (DRL) Deep Reinforcement Learning with 2+ years of in-depth research.
- Proficient in Python, Numpy, Pytorch for building Machine Learning models.
- Authored a DRL library CleanRL with algorithms such as Deep-Q Networks and Proximal Policy Gradient. Received 340+ upvotes from Reddit and 242+ stars from Github.
- Streamline experiment version management that keeps tracks of 200+ experiments with logging of hyper-parameters and important metrics. Selected example see https://cleanrl.costa.sh.

EDUCATION

Drexel University, Philadelphia, PA

Ph.D. in Computer Science **Expected Jun 2023**

- Advisor: Dr. Santiago Ontañón
- Research Area: Game Artificial Intelligence with Deep Reinforcement Learning

Furman University, Greenville, SC

B.S in Computer Science **May 2018**
B.S in Mathematics

EXPERIENCE

Drexel University, Philadelphia, PA

Researcher at Games, Artificial Intelligence and Media Systems Laboratory **Sep 2018 – Present**

- Read and reproduce the state-of-the-art on Deep Reinforcement Learning (DRL) algorithms.
- Develop new DRL algorithms and techniques for Real-time Strategy Games.
- Maintain a DRL library CleanRL with 7+ DRL algorithms implemented (DQN, PPO, SAC, TD3, and others) and benchmarked in 34+ games (Atari, Mujoco, and others.).
- Design scalable DRL infrastructure that is cloud-friendly (e.g. we are able to leverage AWS Batch and Docker to finish 8,000+ CPU hours of tasks within 4 hours).

Graduate Research Assistant **Oct 2019 – Present**

- Utilize Dynamic Bayesian Network (DBN) infer players' intentions in Real-time Strategy Games.
- Use the trained DBN to synthesize potential game states to help the strategy planner.
- Communicate and present our findings to the funding agency and do fast iteration on experiments.

Graduate Teaching Assistant **Sep 2018 – Jun 2019**

- Tutored students with Python and Java lab assignments for 10+ hours a week.
- Collaborate with students and give advice on their final projects.
- Graded students' homework and provided detailed feedback.

Carely, Inc., Greenville, SC

Backend Developer **Jun 2018 – Sep 2018**

- Developed the API server for the web and mobile platforms by using Go and MySQL.
- Perfected the development environment cross-platforms by using Docker.
- Coordinated with the team through Jira, Slack, Github, and OpenAPI(Swagger).

Furman University, Greenville, SC

Computing in Community Deveoper **Oct 2017 – Feb 2018**

- Developed an application that collects the pronunciation of student names for the commencement.
- Collaborated with the university registrar and IT department.
- Utilized Go and Algolia for back-end to build interactive search.

Teaching Assistant   **Aug 2017 – Dec 2017**

- Tutored 30+ students on Web Programming topics: JavaScript, VueJs, Webpack, Vuetify, AWS, PHP, Go, MySQL, Docker, REST API, Python, and Laravel.
- Helped the professor with preparing lab materials with respect to the latest tools and projects.
- Collaborated with the professor to create the course website using the latest front-end tools.

Research Fellow   **Jun 2017 – Aug 2017**

- Authored a Python package, StreetTraffic, that collects more than 100 GBs of traffic flow data.
- Worked with Dr. Chirs Healy to conduct research on travel plan recommendations.
- Set up proper unit-tests and documentation by using Sphinx.

PROJECTS

(2019) CleanRL
High-quality single file implementation of Deep Reinforcement
Learning algorithms with research-friendly features

benchmark.cleanrl.dev   ● Python   ★ 242

(2019) Gym-MicroRTS
The OpenAI Gym wrapper for MicroRTS for DRL research

github.com/vwxyzjn/gym-microrts   ● Python   ★ 18

(2018) Portwarden
Create Encrypted Backups of Your Bitwarden Vault with Attachments

github.com/vwxyzjn/portwarden   ● Go   ★ 179

(2018) Jupyter Disqus
Add Disqus to Jupyter Notebook

github.com/vwxyzjn/jupyter_disqus   ● Python   ★ 12

(2017) StreetTraffic
Collects the traffic flow data of your favorite routes and cities

streettraffic.org   ● Python   ★ 14

(2017) SC2AI
Integrated Tensorforce and OpenAI Gym to train SC II game agents

costa.sh/SC2AI   ● Jupyter Notebook   ★ 12

SKILLS

Python, Pytorch, Tensorflow, Numpy, Git, Linux, Statistics, Go, Docker, JavaScript, SQL.
